Window-Covering Solutions for Today's Home

MechoShade Home Systems
Technology Made Simple

MechoShade Home Systems

The only single-source designer and manufacturer of solar-shading hardware, shadecloths, drapery tracks, electronic-control systems, and accessories.

Today's architects and interior designers recommend and specify MechoShade Home Systems' window-covering products because they are technologically advanced yet easy to use. The hardware is robust, and the broad range of window-covering solutions is extensive—limited only by the imagination.

We provide the most comprehensive selection of motors and controls. Our wide range of products satisfies all high-end or modest project requirements. They integrate with lighting, A/V, and home-automation control systems with exceptional performance.

Our award-winning textile collection includes EcoVeil®, the first Cradle to Cradle Certified[CM] shadecloth. The McDonough Iceland Collection Cradle to Cradle Certified[CM]

The wide range of product includes:

• Easy-to-operate manual solar shades.

• Quiet-yet-powerful motorized solar and room-darkening shades.

• UrbanShade™ light-weight, economic manual and motorized shades.

• WhisperTrac® motorized drapery system.

• PanelTrac sliding flat-panel system.

• SkyLighter® shades.

• Low-voltage communication, dry-contact controls, and control networks.

• IR, RF, and IP/Wi-Fi remote controls to integrate with other manufacturer's control systems.

• More than 200 exclusive shadecloths in a wide range of high-style colors, motifs, weaves, and transparencies.

• A selection of the most popular grasscloths and woods as roman shades.

The easy-to-operate manual MechoShades® with transparent shadecloth

WhisperTrac® motorized drapery-track systems, configured with straight or curved tracks

A roman shade from the exotic Woven Woods and Grasses collection

Group-controlled ElectroShades® with 5% open-weave shadecloth

Technologically advanced window-covering solutions to enhance comfort and view in any environment

Integration with a full-range of 3rd-party control-solution providers

Window-coverings for any room such as:

• Kitchens and baths (where heat control is sought).

• Home office (where glare control is required).

• Bedrooms (where privacy and UV-ray protection are mandates).

• Home-theater media rooms (where room-darkening shadecloths, side-tracks, and theater-type curtains are needed).

• Family rooms (where heat can be reduced and comfort enhanced).

• Living rooms (where protection against harmful UV rays on furnishings is highly desirable).

• Solaria, sunrooms, and conservatories (where custom SkyLighter® shades may be required).

• Clerestory entrances and areas (where shades for out-of-reach windows are needed).

• Monumental windows (where very wide motorized shades are required).

Convenience-technology accessible in the home through:

• Solar-sensor, timer, or SunDialer™ automation.

• Touch screens.

• Personalized computers.

• Plug-in remote control or hardwired switches.

• RF and IR transmitters.

• PDAs, iPods®, iPads® and other handheld Wi-Fi-enabled devices.

• Sun-Activated Controllers (SAC).

The extensive range of shading solutions offers opportunities to the integration professional.

Our integration partners include:

• Control4®

• Crestron®

• Lutron®

• Vantage/Legrand®

• Leviton®

• LiteTouch®

• Savant

• and others
